EDUCATION

National University - Manila

September 2026

BS in Information Technology - Mobile and Web Application

PROFESSIONAL EXPERIENCE

Web Developer Intern

March 2026 - May 2026

National University - Manila

- Built 20+ responsive web pages for 3 system projects using React.js and Tailwind CSS.
- Turned Figma design into web pages with 100% visual accuracy and responsiveness.
- Worked with 3 developers to fix 20+ UI bugs and add 12+ new feature updates.
- Used Git and Qase for code reviews and managing 50+ test cases.
- Assisted in documentation for database references, issues, and development updates.

IT Admin & QA Intern

December 2025 - February 2026

Ollopo Corporation

- Performed weekly QA testing across 4 company websites, finding and logging functional bugs to keep all web features working smoothly.
- Managed and updated property room listings across web portals for accurate user availability.
- Added and updated room listings across web portals, ensuring accurate details and room availability for users.

PROJECTS

T-Global Elite Residences – Marketing Web & Management Platform with Mobile App

Full-stack Development | ReactJS, Tailwind CSS, JavaScript, Flutter, NodeJS

- Architected an interactive marketing web application featuring AR 3D room visualization, VR floorplan tours, an AI-powered chatbot, and real-time room availability tracking.
- Engineered a comprehensive admin portal using React and Chart.js to deliver predictive/descriptive analytics, automated inquiry management, and streamlined administrative workflows.
- Developed a cross-platform Flutter tenant mobile app integrated with Firebase for real-time maintenance reporting, facility reservations, and guest access management.

Online Charity Management System

Front-end Development | PHP, MySQL, JavaScript

- Built a web-based donation and volunteer management platform with an admin dashboard
- Implemented fund tracking, beneficiary management, and activity monitoring features.

Pocket-Tree Budgeting Application

Front-end Development | Java

- Developed a budgeting application for expense tracking and savings monitoring.
- Created a clean and organized user interface for financial management.
